
Declaration of conformity REACH

Eschach, February 2026

With this letter we validate the conformity of our products in accordance with the current version of the European Chemicals Regulation (**EC**) **1907/2006 - REACH**. The REACH Regulation controls the registration, evaluation and authorization of chemicals in the EU with the aim of restricting the use of hazardous substances and groups of substances.

Essential parts of the regulation are:

- Annex XIV – Authorisation List
- Annex XVII – Candidate List (Substances of Very High Concern – SVHCs)

Plastic granules with special chemical compositions are used in the manufacture of our cable management systems. Our products are not subject to registration under the REACH Regulation, which means that we are classified as a “downstream user.” Direct registration is therefore not required.

According to Article 33 of the REACH Regulation, any supplier of products is obliged to pass on information if products contain a substance of very high concern (SVHC) in a concentration of more than 1.000 ppm.

Our cable entry systems generally do not contain any substances that are subject to regulatory approval according to the list of permitted substances in Annex XIV.

Lead (CAS: 7439-92-1) has been included in the REACH Candidate List due to its reproductive toxicity and is therefore classified as a substance of very high concern (SVHC).

Despite this classification, there are currently no restrictions or prohibitions on its use under Annex XVII of the REACH Regulation.

Until the current exemption expires, lead will continue to be used in alloys, particularly in screws, to improve their sliding properties.

Since February 4, 2026, the REACH Candidate List has included 253 listed substances.

Melamine (CAS: 108-78-1) has been on the list since the beginning of 2023.

Our cable management systems may contain small amounts of melamine, particularly in the elastomer material, regardless of color, at a concentration of 1.000ppm to 5.000ppm. This affects both our splittable and non- splittable cable entry frames as well as our cable entry plates, which are partly made of this material.

Should there be any changes to the REACH Regulation or updates to the Candidate List, we will work closely with our partners to check our products for the presence of newly listed substances and will inform you.

Based on the information above, icotek has no legal obligations.

Please do not hesitate to contact us if you have any questions.

With kind regards

Product Management

Michael Maier
